

AL-III-C-054 Concrete Block House
Rt 40
Cumberland vicinity, Allegany County, MD
Not Eligible

This two-story Colonial Revival house is built of yellow concrete block. The five bay building faces north. It is nearly square in shape and is covered by a hipped roof. A one-story porch covers the front of the house and a two-story galleried porch covers the east side. The central entrance is topped by a transom. The house has 1/1-sash windows with concrete sills. A hipped-roof dormer is located on each roof slope.

This house was built in the early 20th century by the Carleton family. The building is a good example of Colonial Revival design but the setting has been severely compromised by the adjacent new U.S. Rt. 220 interchange. Therefore this site is recommended as not eligible for the National Register of Historic Places.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This grand two and one-half story house, constructed of yellow concrete block in the cubiform Colonial Revival mode, is five bays wide and faces north. Its hipped roof is covered with patterned slate, with red terra cotta ridge cresting. Hipped dormers are centered in each slope, and chimneys with terra cotta caps rise from the east and west slopes of the roof. The cornice is boxed, with a moulded architrave and a plain freeze. A porch with turned columns and a modillioned cornice stretches across the north and east facades, extending from the southeast corner of the building to connect with a pedimented porte-cochere which rests on concrete-block piers. On the east side, the porch rises a full two stories and is enclosed with screening.

On the principal (north) facade, a doorway with a transom occupies the central bay, flanked on either side by two 1/1 sash windows. On the second floor, the central bay holds a double 1/1 window, with the remaining fenestration comparable to that below. Jack arches surmount the first-floor openings, and all windows have concrete sills. Each dormer has a double 1/1 window and a lightning rod at its peak.

The building is impressively and appropriately sited near the crest of a hill above the National Pike, with a broad view over Evitts Creek to the ridges beyond.

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This building is significant as an outstanding example of early 20th century concrete block architecture whose form and detailing embody the tenets of the Colonial Revival. It is also significantly associated with the Carleton family, who were among the earliest families to become established in the area.
